Available from November 2026 · Authorized to work in Belgium

Summary

Software Engineer with 5+ years of experience building full-stack and AI-powered applications. Combines **React** and **TypeScript** with **Python**, **FastAPI**, **LLMs**, **RAG**, and **AI agents** to build production-oriented solutions. Experienced in leading small project teams, integrating data and AI pipelines, and turning business requirements into practical applications.

Skills

Generative AI & Data: LLMs, RAG, AI Agents, Prompt Engineering, Machine Learning, Python, NumPy, Power BI.

Front-End: React, TypeScript, JavaScript, Redux, HTML5, CSS3, Tailwind CSS, MUI.

Back-End & Data: Python, Node.js, Django, PostgreSQL, MongoDB, REST APIs.

Testing & Tools: React Testing Library, Cypress, Jest, Git, GitHub, Docker, Figma.

Languages: English (Fluently), French (Basic — A2).

Selected Projects

Banking Campaigns Comparator — ING Challenge

14 Sep. 2026 – Present

[GitHub ↗](#)

- Led a three-person team in building a full-stack platform to analyze and compare banking product communication across multiple Belgian banks.
- Built the **React/TypeScript** frontend and **FastAPI/PostgreSQL** backend, and integrated automated scraping and labeling pipelines into a unified workflow.
- Designed interactive comparisons connecting webpage evidence with human-reviewed labels across messaging, visuals, layout, and calls to action.
- **Technologies:** Python, FastAPI, React, TypeScript, PostgreSQL, SQLAlchemy, Playwright, Docker

Orange Business — Innovation Radar

17 Aug. 2026 – Present

[GitHub ↗](#)

- Contributed to a three-person team developing an AI-powered Innovation Radar for Orange Business, designed to identify and prioritize opportunities from market, research, regulatory, and public-tender signals.
- Supported the development of the full-stack application and data visualizations for exploring and presenting scored opportunities.
- Contributed to the integration and presentation of **Generative AI** outputs, including evidence-grounded proposals, summaries, and opportunity descriptions.
- **Technologies:** Python, FastAPI, React, TypeScript, SQLite, Generative AI, Azure App Service

Immo Eliza — Belgian Real Estate Price Prediction

15 June – Present

[GitHub ↗](#) · [Live demo ↗](#)

- Developed and deployed a web application that predicts Belgian real estate prices from location, living area, room count, and property condition.
- Built a **FastAPI REST API** to serve the **Machine Learning** model and an interactive **Streamlit** interface for users.
- Trained and evaluated regression models on 15K+ Belgian property records and deployed the selected model through a **FastAPI REST API**.
- **Technologies:** Python, XGBoost, Scikit-learn, Pandas, FastAPI, Streamlit, REST API, Docker, Render

Experience

AI & Data Science Trainee

May 2026 – Present

BeCode · Full-time

Brussels, Belgium · Hybrid

- Developing practical **Generative AI** skills with a focus on **LLMs**, **RAG**, **AI Agents**, and **Prompt Engineering**.
- Designing AI-powered applications and data pipelines with **Python**, focusing on LLM-based automation and analytics.
- Collaborating on real-world AI and data projects, combining **Generative AI**, **Machine Learning**, and software development.

Software Engineer

Jul. 2022 – Jul. 2023

Squad

Paris, France

- Led **React** frontend development for Admin Squad and Shopify Squad apps adopted by several Shopify clients in France.
- Translated **Figma** designs into responsive interfaces and integrated them with backend APIs.
- Developed scalable frontend architecture with **React**, **TypeScript**, **Redux**, **HTML**, **CSS**, and **Tailwind**.
- Supported **Django** API design and authored unit tests with **React Testing Library**.

Software Engineer Intern

Sep. 2021 – Mar. 2022

Hello Pomelo

Paris, France

- Engineered a full-stack requirements application using **Flutter**, **React**, and **Node.js**.
- Automated PDF generation and email delivery to streamline client and marketing workflows.

Software Engineer

Dec. 2019 – Jul. 2020

FPT Software — Client: PatientPop, USA

Ho Chi Minh City, Vietnam

- Developed frontend and backend features for a real-time chat and calling application in a **microservices** system using **React** and **Node.js**.
- Implemented **Cypress** end-to-end tests and **React Testing Library** component tests, improving stability and reducing regressions.
- Collaborated with a large US-based cross-functional team to integrate features into a broader ecosystem.

Software Engineer

Aug. 2018 – Aug. 2019

Axon Active Vietnam

Ho Chi Minh City, Vietnam

- Developed and maintained internal systems for marketing, HR, recruitment, payroll, and workforce management.
- Built applications with **React**, **WordPress**, **jQuery**, **PHP**, **Java Spring**, and **PostgreSQL**.
- Worked with cross-functional stakeholders to deliver tools that improved productivity and operations.

Software Engineer

Jul. 2016 – Jul. 2018

ISB Vietnam Company (IVC)

Ho Chi Minh City, Vietnam

- Customized **Odoo** ERP solutions for Novaland Group and built sales reports with **SQL** and **Python**.
- Developed a **CakePHP** payroll and expense system for Sagawa Express, covering hours, wages, and transportation claims.
- Delivered responsive frontend and efficient backend solutions while gathering requirements directly from clients.

Education

EPITA

Le Kremlin-Bicêtre, Paris, France

Master of Science in Computer Science — Software Engineering

Oct. 2020 – Apr. 2022

University of Science, Ho Chi Minh City

Ho Chi Minh City, Vietnam

Bachelor of Science in Physics — Physics and Computer Science

Oct. 2012 – Oct. 2016
